

COURSE DESCRIPTIONS

HON 300AE Trekking to Santiago de Compostela: Expe 4 CREDITS

This course, which can be taken for Anthropology, Honors, or Spanish credits, offers a broad perspective on the political, social, economic, linguistic, cultural, historic and prehistoric context of the road to Santiago and on the idea of pilgrimage itself. The route takes us through El Camino del Norte and El Camino Francés from San Sebastian [Basque, French and Spanish Region] to Santiago de Compostela [Galicia Region], a site sacred to Christians since the middle ages, and presently trekked by thousands for religious and nonreligious reasons. The physical challenge of pilgrimage is a catalyst for personal and academic growth. The cultural and linguistic immersion will deepen fluency in Spanish and appreciation of Spanish culture. The anthropological focus will teach us how to conduct exploratory ethnography through the study of tourism, show us how a "real world" experience can be analyzed and made comprehensible with theory, and understand the experience of "communitas" and the pilgrim memoir. The Camino is a 790 kilometer museum surrounding by a vibrant living community, drawing people from diverse places and backgrounds. Participants will learn about pilgrimage by becoming pilgrims-by walking with head, heart, and body along the Camino. This MTSE is physically challenging and we must be prepared to walk a number of miles on most days. For almost 4 weeks, we will live the simple life, carry what we need on our backs, sleep in simple quarters called albergues, and experience the Spanish countryside and the incredible people of Spain. We will have experiences on the trail that can't be replicated elsewhere.

HON 201 Welcome to Thinking I 4 CREDITS

This sequence guides students through the transition to college-level work by engaging primary texts in literature, history, and philosophy from around the world and across epochs. Organized each year by a theme-e.g., authority and freedom, other worlds, friendship, crossing borders-the class helps students learn to develop their own views of the works assigned through deep analysis, and to write about their thinking in reasoned, mature prose (through short weekly writings, longer essays, and lots of feedback). The course is conceived as a conversation among students and the two professors about provocative ideas and disciplines in dialogue. Overall, students learn the foundational thinking, writing, and speaking skills for future Honors seminars, the rest of college, and life outside the classroom.

HON 202 Welcome to Thinking II 4 CREDITS

This sequence guides students through the transition to college-level work by engaging primary texts in literature, history, and philosophy from around the world and across epochs. Organized each year by a theme-e.g., authority and freedom, other worlds, friendship, crossing borders-the class helps students learn to develop their own views of the works assigned through deep analysis, and to write about their thinking in reasoned, mature prose (through short weekly writings, longer essays, and lots of feedback). The course is conceived as a conversation among students and the two professors about provocative ideas and disciplines in dialogue. Overall, students learn the foundational thinking, writing, and speaking skills for future Honors seminars, the rest of college, and life outside the classroom.

HON 203 Welcome to Thinking III 4 CREDITS

This seminar guides students who have entered the Honors program by lateral entry admission through the transition to Honors by engaging primary texts in literature, history, and philosophy from around the world and across epochs. Organized each term by a theme-e.g., authority and freedom, other worlds, friendship, crossing borders-the class helps students learn to develop their own views of the works assigned through deep analysis, and to write about their thinking in reasoned, mature prose (through short weekly writings, longer essays, and lots of feedback). The course is conceived as a conversation among students and the two professors about provocative ideas and disciplines in dialogue. Overall, students learn the foundational thinking, writing, and speaking skills for future Honors seminars, the rest of college, and life outside the classroom.

HON 211 Global Welfare and Justice 4 CREDITS

Economic inequality continues to increase throughout the world, putting more human beings in poverty. The 21st century poses a significant challenge therefore to political and economic institutions to deal effectively and justly with this increasing economic inequality-as-poverty. This course explores the political and economic literature on distributive and economic justice, from classical sources to more contemporary sources such as liberalism, Marxism, feminism and cosmopolitanism, to better understand how we

might eradicate poverty and economic inequalities through just institutional changes in the 21st century.

HON 212 Arts and Performance 4 CREDITS

Using a multi-disciplinary approach that emphasizes direct artistic experiences, this course explores the what and the why of both arts and performance. As in the creation of art itself, this seminar engenders curiosity, considers context, welcomes risk-taking, and fosters an environment that leads to openness and depth of connection. Primary sources include the specific artistic interests of individuals within the class as well as a variety of arts events within the Westminster and Salt Lake communities. Firmly committed to the idea that being an educated, active, and fully alive individual requires engaging with and critically/creatively responding to the arts, we examine a wide variety of artistic works in the visual arts, music, dance/movement, drama/theatre, as we explore essential questions related to the arts, to creation, to life. Students develop a sense of openness to unexpected possibilities through the recognition of the place for the arts in their lives.

HON 213 Environments and the Space of Art 4 CREDITS

This course explores the intersection of art and the environment across a broad understanding of each sphere. Faculty and students will explore primary texts and experiences that lend an understanding to our place within the arts (visual, literary, sound, performative) and environment (natural, constructed, scientific). Topics might include, for example, unexpected nature, ecosystems and creativity, environmental and cultural changes, and the collateral ideas formed between art and nature. The state of Utah and the surrounding regions provide a remarkable backdrop for exploring these topics through field trips and study. Other learning activities-writing, conversation, and reflection-will offer students myriad ways to appreciate our place in environments and the space of art.

HON 221 Science as Knowledge 4 CREDITS

When we hear someone say "That's not science," it sounds inherently dismissive. In this interdisciplinary seminar, we will discuss the special status often given to scientific knowledge relative to other forms of knowledge and explore the ways in which that status might help or hinder our ability to actually understand our universe. We will build on this discussion to critically evaluate the notions of certainty, authority, and progress that are often intertwined with scientific knowledge, as well as the degree to which scientific knowledge reflects the culture that develops it.

HON 222 Science, Power, and Diversity 4 CREDITS

This seminar explores the relationship between scientific knowledge and power, especially as this relationship intersects with issues of diversity. Students will engage with major ideas and texts from the last century in the contemporary philosophy of science, science and cultural studies, and the natural and physical sciences. Epistemological and ethical issues in the production and dissemination of science knowledge are discussed, as are issues of race, gender, culture, and justice pertaining to science in society. Students will gain critical perspectives on popular contemporary scientific discourse by analyzing ideas from primary source texts, critical accounts of science, and scientific journalism.

HON 231 Human Culture and Behavior 4 CREDITS

Why do people do the things they do as individuals, groups, or as a society? How does our culture and society shape human behavior? How does our behavior shape society? Are the answers to be found in genetics, socioeconomic status, gender, culture, and/or elsewhere? This seminar explores the intersection of human culture and behavior via the methods and perspectives of a variety of social science disciplines. The course examines topics as diverse as violence, law and crime, sexuality and sexual identity, and gender and racial injustice.

HON 232 Data/Society/Decision-Making 4 CREDITS

We are surrounded by data. Even when we're unaware of it, data informs key systems upon which we rely: transportation, politics, computing, medicine, and commerce, just to name a few. In this course, we seek to develop an understanding of the nature of data-what it is, how it is gathered and stored, what it purports to measure, and what it actually measures. Quantitative tools are developed to analyze data while simultaneously exploring the value and limitations of such analysis. The ultimate goal is to connect data to the process of making decisions, with examples from a variety of fields used to illustrate its successes and failures.

HON 300 Special Topics in Honors 1 to 4 CREDITS

These seminar topics vary from year to year. They primarily focus on specific topics raised in the interdisciplinary Honors core seminars, e.g., "Reading & Writing the City" or "Humanitarian Law," but which are explored in depth in these seminars. May be taken more than once for credit. Departmental special topics courses may be crosslisted with these seminars. Offered Fall, Spring and May Term.

HON 400 Special Topics 1 to 4 CREDITS

These seminar topics vary from year to year. They primarily focus on specific topics raised in the interdisciplinary Honors core seminars, e.g., "Reading & Writing the City" or "Humanitarian Law," but which are explored in depth in these seminars. May be taken more than once for credit. Departmental special topics courses may be crosslisted with these seminars. Offered on occasion.

HON 401 Directed Studies in Honors 1 to 4 CREDITS

A tutorial-based course used only for student-initiated proposals for intensive individual study of topics not otherwise offered in the Honors Program and for student-initiated, interdisciplinary research projects. Prerequisite: consent of instructor(s), Honors College dean, and school dean.

HON 402 Senior Project/Thesis 3 CREDITS

A self-directed project or thesis that covers a topic in the student's major discipline or of an interdisciplinary nature and therefore not covered under a single discipline-specific thesis course. Project completed with a supervisory committee of at least two faculty members: one as a lead sponsor/mentor and one or more as second reader(s). At least one of the sponsors or readers must be an Honors Program faculty member. Prerequisite: senior standing and consent of instructors and Honors College dean.

HON 403 Capstone Conversations 0 to 1 CREDITS

This course provides a capstone experience that challenges students to reflect on the process of creating independent scholarship in an interdisciplinary learning context. Faculty and students will examine the diverse set of skills required to produce high quality independent scholarship, from the generation of project ideas, to project planning and implementation, to the presentation of their work in a variety of potential formats. At each meeting, students will discuss their progress and approaches to handling upcoming challenges on their independent capstone projects, receiving support, feedback, and input from their peers in other disciplines. In particular, cross-disciplinary conversations will encourage students to draw inspiration from colleagues in other fields and see how their research might have applicability to those fields. The capstone seminar will culminate with the presentation of their project to the Honors and College communities. This course is repeatable for credit.

HON 440 Internship 1 to 4 CREDITS

Offers students the opportunity to integrate classroom knowledge with practical experience. Prerequisites: junior or senior standing (for transfer students, at least 15 hours completed at Westminster or permission of instructor), minimum 2.5 GPA, completion of the Career Center Internship Workshop, and consent of program director and Career Center Internship Coordinator. REGISTRATION NOTE: Registration for internships is initiated through the Career Center website and is finalized upon completion of required paperwork and approvals. More info: 801-832-2590 https://westminstercollege.edu/internships
